CAREER OBJECTIVE

I am a Flutter Developer with over one year of experience in building scalable, high-quality mobile applications using Flutter, Dart, and clean architecture principles. I am passionate about creating intuitive user experiences through innovative UI design, efficient API integrations, and performance optimization. My goal is to continue growing as a developer while contributing to impactful, real-world projects that deliver meaningful value.

SKILLS

| | |
|-------------------------|---|
| Technical Skills | Dart, Flutter, GetX, RESTful API, Firebase, Clean Architecture |
| Tools | Git, GitHub, Android Studio, Visual Studio Code, Postman, Figma |

EXPERIENCE

| | |
|---|---|
| Flutter Developer (Full-time) Coding Beats | Dec 2024 - Present <i>Lahore, Pakistan</i> |
|---|---|

- Independently built and maintained features in production-level Flutter apps, resulting in improved performance, scalability, and user satisfaction.
- Led the development of responsive UI components and seamless API integrations for key projects, including LocumKit (Payroll System) and Weepullup (eCommerce Platform).
- Applied Clean Architecture principles and utilized tools such as Firebase, Git, and Postman to streamline development workflows and enhance code maintainability.
- Collaborated closely with backend developers to integrate RESTful APIs, significantly improving application functionality, responsiveness, and user experience.
- Gained hands-on experience in Flutter development, with a strong focus on UI/UX design, state management (GetX), and efficient API consumption, contributing to project success and timely delivery.

| | |
|---|--|
| Flutter Developer (Final Year Project) Comsats University Islamabad, Attock Campus | Mar 2023 - May 2024 <i>Attock, Pakistan</i> |
|---|--|

- Developed a comprehensive productivity app using Flutter, Dart, GetX, Firebase, Git, and GitHub.
- Boosted task completion rates by implementing categorized and prioritized task management with a dynamic calendar and reminders.
- Improved user focus and habit-building through features like focus mode, Pomodoro timer, habit tracker, and an analytics dashboard.

PROJECTS

Weepullup: eCommerce Platform

- Contributed to the development of a large-scale eCommerce platform, focusing on UI components and user experience.
- Implemented API integrations to manage multiple stores, products, courier flow, and customer data, ensuring smooth transaction processes.
- Optimized app performance and scalability to handle high traffic and large volumes of data efficiently.

LocumKit: Payroll Management System

- Developed a payroll management system to streamline payment processing for professionals.
- Integrated RESTful APIs with GetX for state management, ensuring real-time data synchronization and efficient UI performance.

- Applied clean architecture principles to ensure scalability, maintainability, and ease of future updates.

Productivity App (Final Year Project)

- Developed a comprehensive productivity app using Flutter, Dart, GetX, Firebase, Git, and GitHub.
- Boosted task completion rates by implementing categorized and prioritized task management with a dynamic calendar and reminders.
- Improved user focus and habit-building through features like focus mode, Pomodoro timer, habit tracker, and an analytics dashboard.

Intensify Surveillance System

- Built a real-time surveillance app in Flutter integrating YOLO v2, MobileNet, and SSD for object detection.
- Enabled live object recognition, tracking, and instant alerts for security use.
- Designed intuitive UI with Flutter and applied deep learning models for accurate real-time monitoring.

WhatsApp Clone

- Built a full-stack messaging application using Flutter, Dart, Firebase, Agora SDK, Git, and GitHub, increasing user engagement.
- Enhanced security and reliability by reducing login issues through secure phone number authentication.
- Achieved an increase in user retention by implementing video calling, status updates, and Clean Architecture for maintainability.

Flutter Chat App

- Created a chat application with Flutter, Dart, Firebase, Firebase Cloud Messaging, Firebase Cloud Storage, Git, and GitHub, optimizing message delivery speed.
- Improved user login success rate using seamless Firebase Authentication integration.
- Enhanced user experience with Firebase Cloud Storage for efficient media management and push notifications for user activities.

Bitcoin Ticker

- Developed a Flutter app for real-time cryptocurrency price tracking using REST APIs and Provider for state management.
- Implemented dynamic UI updates, smooth offline support, and error handling.
- Delivered a responsive, user-friendly experience for crypto enthusiasts.

Clima App

- Created a weather app in Flutter integrating OpenWeatherMap API, geolocation, and manual search.
- Designed an engaging UI with weather animations and efficient state management.
- Provided accurate, real-time weather updates with a lightweight, responsive design.

EDUCATION

| | |
|--|-------------|
| Bachelor of Science in Computer Science , COMSATS University Islamabad, Attock Campus | 2020 - 2024 |
|--|-------------|
